- [Bug fixes](#)

Sprint goal

GraphQL endpoints for order wizard, bugfixes

Improvements

- [Updated booking confirmation email for support to include more details](#) [SN-6719]

API changes

- Added GraphQL query for getting address book configuration [SN-6022]
 - Includes address fields and active address books
- Added GraphQL query for searching addresses in address book [SN-6022]
 - Includes support for filtering by keyword
- Added GraphQL mutation for selecting an address for current order [SN-6022]
- Added GraphQL query for getting order history configuration []
 - Includes order search fields and sorting options
- Added GraphQL query for searching order history for current user [SN-6087]
 - Includes support for filtering and sorting
- Extended GraphQL for order query to include shipping and billing address data [SN-6449]
- Fixed problem where GraphQL search article config included incorrect sort options [SN-6791]

- Fixed problem loading GraphQL article search results when new fields were defined [**SN-6782**]
- Improved error message when using unsupported filter to include supported filters
- Improved error handling when using unsupported sort option

Bug fixes

- Fixed problem where cancelling an artwork item lead to cancelling the draft order [**SN-6753**]
 - Also prevent any draft order from automatically getting a status change
- Fixed problem where changes in article Excel import were not detected and saved [**SN-6827**]
 - Only applied to changes on custom fields
- Fixed problem where global address book did not return any results
 - Resolved by fixing problem in search indexation for addresses
 - Re-index of addresses will start automatically after system update
